Delivering the 200th Long Reach Boom Built by Robotic Welding Machine

Designed for Functionality, Engineered for Reliability.

This month we celebrated delivering the 200th unit of long reach built by robotic welding machine. For readers who has been following our bi-monthly newsletter would realize that the robotic welding machine was installed not too long ago. The milestone we achieved dedicated to our committed teams that determine to making things happen.

Robotic welding machine for buckets

Smile for the good deal

Another robotic welding machine is churning out more buckets everyday in the production lines.

It never failed to bring smile to customers who know that he/she is getting a product built to the highest attainable precision and quality of the machine can achieve.

EIK is the selective few aftermarket manufacturer for long reach boom and attachments that have invested heavily in automation and robotic system.

Our Indonesia dealer is participating in a massive clean out project in Jakarta. A project initiated by the local government aiming to create a better living condition for millions of city dwellers in Jakarta, one of the most populated city in Asia.

Canal clean out by Amphibious Excavator

Creating a better living condition

Winding canals and obscure waterways system in the city post a massive challenge to standard excavator which has always failed to carry out the task. The only proven solution that has risen to the decades long challenge is the amphibious excavator with a long reach front.

Our past successful completion in similar clean out exercise need no further persuasion to the local government that both our team and machine can deliver the desire result.

Before and after the clean out

A world of difference

Every once a while we need a recharge. Our team has gathered for a 3 days skill based training and experiential learning program. The objective is to acquiring new skills and to further enhance our team spirit for next milestone.

Experiential learning and team building

Reflection, Refreshed & Recharged
